tsm jobs

You can use the `tsm jobs` commands to list, reconnect to, and cancel jobs.

- [cancel](#)
- [list](#)
- [reconnect](#) :::

[](#){.icon--med-lg .icon--arrow-up .heading-item__icon}{.heading-item__link .print-hidden} [](#tsm)tsm jobs cancel

Cancel a job on the server. Any job can be canceled before it starts running (when queued), but only backup and cleanup jobs can be canceled when they are already running.

Synopsis

```
tsm jobs cancel --id <jobID> [global options]
```

Options

-i,--id <jobID>

Required.

Id of the job to cancel.

[](#){.icon--med-lg .icon--arrow-up .heading-item__icon}{.heading-item__link .print-hidden} [](#tsm2)tsm jobs list

List asynchronous jobs on the server.

Synopsis

```
tsm jobs list [--status <status>] [global options]
```

Options

-t,--status <status>

Optional.

Filter for jobs that match the given status.

[](#){.icon--med-lg .icon--arrow-up .heading-item__icon}{.heading-item__link .print-hidden} [](#tsm3)tsm jobs reconnect

Reconnect to an asynchronous job to display its progress. If no job id is specified, it reconnects to the latest job.

Synopsis

```
tsm jobs reconnect[--id <jobID>] [global options]
```

Options

-i,--id <jobID>

Optional.

Specifies the id of the job that should be reconnected.

[](){.icon--med-lg .icon--arrow-up .heading-item__icon}{.heading-item__link .print-hidden} Global options

-h, --help

Optional.

Show the command help.

-p, --password <password>

Required, along with `-u` or `--username` if no session is active.

Specify the password for the user specified in `-u` or `--username` .

If the password includes spaces or special characters, enclose it in quotes:

`--password "my password"`

-s, --server https://<hostname>:8850

Optional.

Use the specified address for Tableau Services Manager. The URL must start with `https` , include port 8850, and use the server name not the IP address. For example `https://<tsm_hostname>:8850` . If no server is specified, `https://<localhost | dnsname>:8850` is assumed.

--trust-admin-controller-cert

Optional.

Use this flag to trust the self-signed certificate on the TSM controller. For more information about certificate trust and CLI connections, see [Connecting TSM clients](#).

-u, --username <user>

Required if no session is active, along with `-p` or `--password` .

Specify a user account. If you do not include this option, the command is run using credentials you signed in with.
